Professional Summary

Computer Science undergraduate with experience building user-focused products and automation solutions. Strong in communication, problem solving and collaboration, with an interest in business development, marketing and EdTech.

Education

St. Joseph's Institute of Technology
B.E. Computer Science and Engineering

Chennai, India
2023 – 2027 CGPA: 7.8 / 10 (till Semester 6)

Skills

Communication: Communication, Presentation, Team Collaboration, Problem Solving, User Understanding

Design & Product: Figma, Wireframing, Prototyping, UI/UX Design, User-Centered Design

Technology: Java, JavaScript, Python, React.js, HTML5, CSS3, Spring Boot, REST APIs, MySQL

Automation & Tools: n8n, Zapier, Microsoft Power Automate, UiPath, Git, GitHub, Postman

Experience

Front-End Developer Intern
Bevywise Networks LLP

Jul 2025 – Aug 2025
Tirunelveli, India

- Contributed to a real-time UPS Management System, translating monitoring requirements into clear, user-friendly dashboard interfaces.
- Presented live power, battery and fault data through structured layouts that supported quick information discovery and decision-making.
- Applied UI/UX and accessibility principles to improve usability and consistency across the product.
- Collaborated with the team and tested across browsers and screen sizes to resolve usability issues and ensure a reliable experience.

Projects

CVPartner: Automated Resume Builder

Telegram Bot, n8n, Workflow Automation

- Identified a common user pain point – manual resume creation – and built a conversational Telegram bot to simplify the process through guided prompts.
- Automated the end-to-end workflow in n8n, coordinating user input, document generation and delivery without manual intervention.
- Reduced resume turnaround time from a multi-step manual process to under 60 seconds, improving user experience and efficiency.

ExpenseFlow: Role-Based Expense Approval & Analytics Platform *React, Spring Boot, MySQL*

- Understood the workflow needs of different user roles (Employee, Manager, Finance, Admin) and designed a role-based approval system.
- Built a multi-level approval workflow with automated notifications, improving communication and transparency between stakeholders.

AirScribe: Real-Time Touchless Handwriting Recognition System *Python, OpenCV, MediaPipe, TensorFlow/Keras*

- Developed an AI-based solution that converts natural hand movements into digital text, addressing accessibility and touchless interaction needs.
- Translated a technical computer-vision pipeline into a practical, user-facing tool, demonstrating problem-solving and innovation.

Certifications & Achievements

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Database Management System – NPTEL
- Stress Management – NPTEL Silver (Elite)
